

Frontline VM™

Scalable, Risk-based Vulnerability Management

With cyber attacks on the rise and a shrinking cyber security talent pool, IT teams are being asked to do more with less.

Fortunately, [Frontline Vulnerability Manager™ \(Frontline VM™\)](#) is designed to streamline the identification and prioritization of system weaknesses, so you can maximize existing IT resources and mitigate risks swiftly and effectively.

Provided via our SaaS platform, Frontline VM is lightweight yet powerful and capable of scaling up or down to meet your changing business needs.

Frontline VM combines patented scanning technology with an easy to use GUI and asset data correlation to produce fast, accurate results (less than 1% false positives). The robust feature set of Frontline VM includes:

- [Frontline Security GPA security posture rating](#)
- [Frontline Insight peer comparison](#)
- [Frontline Network Map asset visualization](#)
- [Frontline Threat Rank exploitability context](#)
- [Frontline Connect API](#)

Come for the Technology, Stay for the Support

Frontline VM also boasts superior customer support. Our loyal and happy user base consistently gives us 90+ customer satisfaction scores and **Net Promoter Scores (NPS) of 75 or better**.

Experience a powerful, user-friendly solution backed by top-shelf expert support.

Proactive Security Solutions for Organizations of Any Size in Every Industry

Frontline Advanced™

Frontline Advanced is Digital Defense's flagship vulnerability management subscription offering.

Powerful and effective, Frontline Advanced is conveniently bundled into a rich, affordable, and easy to consume annual subscription that includes:

- Frontline VM scanning and features
- Unlimited users
- Client Advocate support
- Quarterly/monthly/unlimited scan frequency
- 24/7 support
- Access to Active View Dashboard
- User-friendly, aggregated scan results
- Robust filtering and labeling capabilities
- Patented host correlation

Frontline Pro™

Frontline Pro provides the same industry leading solution subscription as Frontline Advanced, but adds a Personal Security Analyst (PSA). PSAs perform the work of running your scans, analyzing the results, generating reports, and providing direct remediation planning guidance for you, as opposed to your security team doing that themselves. It's the ultimate outsource for all size organizations and is especially helpful for organizations that have limited security management time or expertise.

| | Frontline Advanced™ | Frontline Pro™ | Frontline PCI-Pro™ |

Gain Insight into Your Real Security Threats

When vulnerabilities are detected, Frontline VM quickly provides prioritization and remediation information so immediate action can be taken.

Fan Favorites

Some of our customers' favorite features

Frontline Security GPA® -

Frontline Security GPA is an easily understood metric that facilitates simpler security conversations. It is based on an algorithm that takes into account both the network security posture rating and the business risk associated with discovered vulnerabilities.

Client-defined Risk Ratings -

Set the business risk level of your IP devices to a level based on the device's criticality to the organization. Easily pinpoint areas of high risk and focus efforts on defending your enterprise.

Results Are Key

Digital Defense Vulnerability Management Services allow organizations to:

- Leverage DD's technical expertise world-class customer service and support
- Focus on core business functions to save time, money, and effort by reducing the administrative burden and tedium of performing vulnerability scans with complicated tools or unmanaged open source solutions
- Demonstrate your commitment to information security with comprehensive reporting on the security posture of your network
- Detect possible security vulnerabilities and respond quickly with actions based on your pre-defined security policies

Join the thousands of customers who trust Digital Defense to protect their business critical assets.
